

# How busy is Seville - Guilford Fire Department?

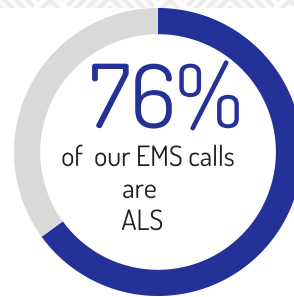

## Statistics on EMS Calls

### EMS Calls

When people need medical attention, we respond quickly and efficiently to provide that care.

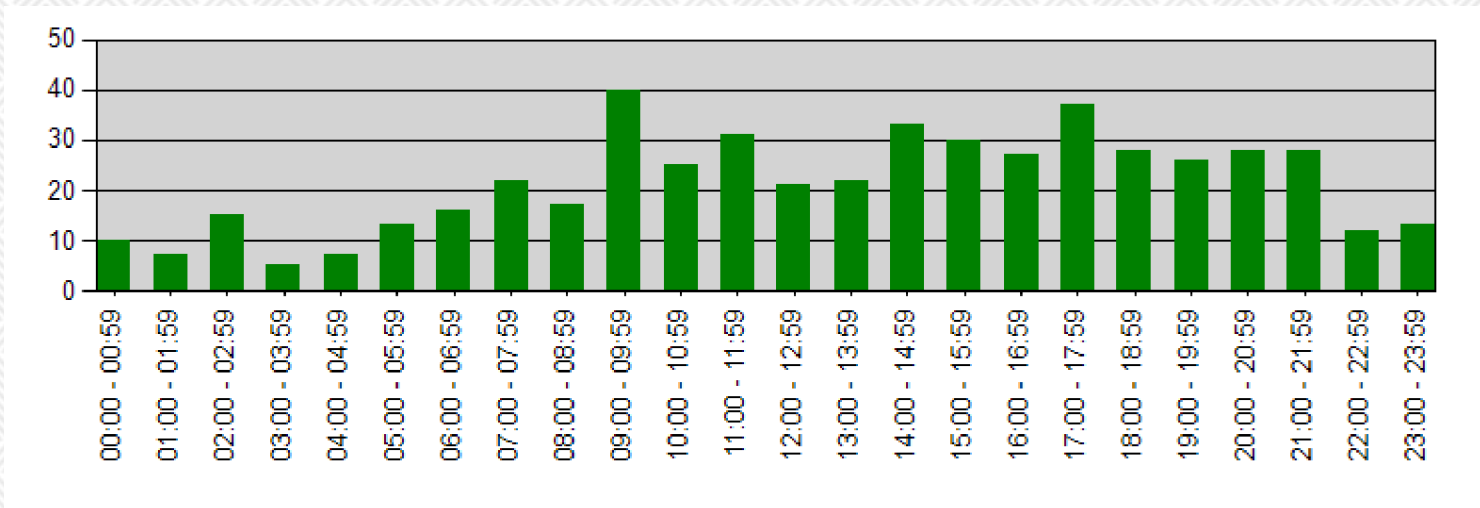

### Advanced Life Support

76% of the patients we transported were provided Advanced Life Support level of care. This is the highest level of care that can be provided in a prehospital setting. Many times this early intervention is key to best possible outcomes.

## EMS Calls by Time of Day

At SGFD we believe that the 3 am call is just as important as any other time of day. 24 Hour staffing allows us to answer your needs quickly no matter what time it is.

## Statistics on Fire Calls

26% of our calls are fires- this includes vehicles, structures and other types of fires. The remaining percentage of our calls include a variety of assistance to the community.

There are occasions when call volume or large events overwhelm current staffing at fire departments. All departments in Medina County have a plan to help each other out when this happens. Through the use of a Mutual Aid agreement, dispatchers are able to quickly get other agencies alerted to help their neighboring community. Mutual Aid provided accounts for about 12% of our call volume. SGFD requests mutual aid for less than 3% of our calls. Our full-time staffing reduces the amount of time our community has to wait for help to arrive from other departments.
